## **West Nile Virus Detected in Hapeville Mosquito Samples**

The Fulton County Board of Health has confirmed that mosquito samples collected in Hapeville have tested positive for West Nile virus.

### How to Protect Yourself:

To reduce your risk of exposure, the City urges residents to take the following precautions:

- ✓ Use EPA-approved insect repellent when spending time outdoors
- ✓ Eliminate standing water around your home (buckets, flower pots, birdbaths, etc.)
- ✓ Wear long sleeves and pants during dawn and dusk, when mosquitoes are most active
- ✓ Ensure window and door screens are in good condition to keep mosquitoes out

Let's work together to stay safe and reduce the spread of mosquito-borne illnesses in our community.
